Riepilogo

As a Linux lover, CLI it's my daily bread!

I usually start my day by checking the following dashboards:
StackOverflow|Codewars.
I strongly adopted the TDD approach during the OOP development
session, cause "In test we trust" :)

My best goal is to improve my current OOP skills.

I also stay up to date attending the following courses regarding:
BigData|MapReduce and Docker|K8s journey.

____

Python daily addicted!
MongoDB fan
GitHub active user <3

**Always Git Version Control System && Version Control Images
[Docker]**

I'm waiting for PYCON X and BIGDIVE! DONE

Concept Quality Reply
1 anno 11 mesi

Software Developer
settembre 2020 - Present (1 anno 2 mesi)
Torino, Piemonte, Italia

Robotic engagement using an eDo robotic arm based on ROS common framework
- Rpi3+
- ROS framework
- pyedo python sdk

- arduino ultrasonic sensor experience using C and ARDUINO IDE

Activities based on robotic joint movements.

Software Developer
dicembre 2019 - Present (1 anno 11 mesi)
Torino, Italia

Technical leadership of a customer project based on DOCKER system, PYTHON development test framework application. All of the project is managed using GIT as Version Control System. Using pipeline server execution validation automatically executed in different Azure Cloud agents provided from customer.
Docker Environment setup activities, boost reached with docker-compose power.
Git leadership handle using PR process based on Rebase strategy and coding review.
Python as main language with Pytest common framework to plan the test automation executions with custom OOP extensions

Mainteiner of many of internal packages such like:
- Azure devops python package
- Software Update python package
- yaml validation python package

Requirements assessment achieved directly with customer discussion

IntegratedSolutions
Software Developer
luglio 2018 - dicembre 2019 (1 anno 6 mesi)
Torino, Italia

PHP backend developer -> Symfony similar framework
API system
TYPESCRIPT frontend developer -> Angular 5+
svn/git

Development||Staging||Production environments manager.

Python tools to test and sync and help development session.

JIRA for project management

Altea Digital
Fullstack Web Developer
luglio 2017 - giugno 2018 (1 anno)

Torino, Italia

|| BACKEND || DJANGO | PYTHON DEVELOPMENT :

- project configuration

- third-party installation

- log development

- template engine Jinja2

- function based and class based views

- data modeling

- APIrestful design [django rest framework]

THIRD-PARTY:

djangorestframework | djangocrudbuilder | django-material | django-import-export | django-cookiecutter

MOST USED BUILT-IN LIBS:

csv | logging

MOST USED BUILT-IN METHODS:

model_to_dict() | eval() | dir() | .__name__ | __unicode__()

AGILE DEVELOPMENT:

- backlog ticketing (ASANA)

- pair programming

VCS:

-git (GITHUB, BITBUCKET)

DEPLOY:

- Docker

- Docker-compose

TOP-IX Consortium
Studente tirocinante
aprile 2017 - giugno 2017 (3 mesi)
Torino, Italia

Software Developer | Agile Development

Frontend: Bootstrap, AngularJS

- edit Django admin Page

- FAQ & terms page bootstrap

- bootstrap changes (Accordion, Nav, Search, Panel)

- changes with browser console

Backend: python, nodejs

- Django send mail method

- Django query db

- API http request Django/AngularJS

- CRUD blog Flask | python

Version Control System: GitHub(public repository), BitBucket(private repository)

- master Git skills

Cli: bash scripting

- speed up process

Associazione Gioc - Gioventù Operaia Cristiana
Servizio Civile Nazionale
aprile 2015 - aprile 2016 (1 anno 1 mese)
Torino, Italia

Tra i progetti a me assegnati:

- Pubblicazione di Eventi interni all'associazione (13 novembre,1°maggio)

- Progettazione di una giornata di orientamento

- Promozione e Sensibilizzazione

- Attività di Aggregazione nei Centri Formativi Professionali

GM Telecomunicazioni
Operatore di call center
luglio 2014 - novembre 2014 (5 mesi)
Orbassano

-Attività di promozione e vendita di servizi Outbound
